# LCEC's Qualification Process

The process of qualification for Energy Service Companies in Lebanon is part of Lebanon's National Energy Efficiency Action Plan.

It aims at supporting the market, promoting investments in energy-efficiency services and helping stakeholders (potential beneficiaries and local financial institutions) identify the companies providing such services.

All listed companies are specialized in energy-efficiency improvement services and set as legally independent entities even when they are part of larger groups providing other services.

The qualification process is active all year long - companies can submit an application any time during the year. However, the LCEC evaluation committee will gather a definite number of times per year to assess the recently submitted applications. The next evaluation will be set in July 2018. More details will follow on LCEC's website.

SEEDS	Mario Saab Managing Partner	<a href="http://www.seeds-intl.com">www.seeds-intl.com</a>

*(companies are listed in alphabetical order)*

# Notes

- This list is issued by the Lebanese Center for Energy Conservation (LCEC) based on a set of criteria previously detailed and reflected by a grading system.
- The list cannot be used as a guarantee of quality - anyone requiring the services of any of these companies is still responsible to check the energy measures that the company is advising and installing.
- Attempting to use the list in an unethical manner will result in immediate blacklisting of the company in all current and future activities related to the Ministry of Energy and Water and the Lebanese Center for Energy Conservation.
